

# FERAL HOG MANAGEMENT

## Feral hogs are a dangerous, destructive, invasive species.

Many groups and landowners are highly interested in what can be done to control the feral hog problem. The feral hogs have been identified in all 77 counties of Oklahoma. This presentation will cover feral hog management techniques including current and evolving techniques for hog control and trapping. Multiple traps will be on-site for demonstration and education.

**Wednesday, January 10 | 9:30 AM-2:30 PM**  
Muskogee Campus, Bld C, Brackeen Center  
2403 N. 41st Street East, Muskogee, OK

**No Charge, Pre-registration Required**
